----- The Comments -----

The article is not relevant to the topic.
Articles are not the same as templates. Use the abbreviation "Fig. 1", even at the beginning of a sentence.
Figure Labels: Use 8 point Times New Roman for Figure labels.
The introduction should not contain a literature review, the format refers to the template.

AUTHORS: Rina Harimurti, Ibrohim Ibrohim and Syariffuddien Zuhrie

----- The Comments -----

- a. Please follow the IEEE Conference template in writing papers, especially on figure captions and table heads!
- b. Emphasize the novelty of your research! Maybe there is a recent development related to project based learning that can be applied to this research.
- c. When using acronyms for the first time, it is important to explain the full term first. Then, you can utilize the acronym for next.
- d. Cite more recent and relevant references especially international journals or proceedings!
- e. In figure 1, letters are too small, Enlarge or Redraw this figure!
- f. Make sure that all figures have been cited in the relevant sentences!
- g. When you have cited a figure or table, you do not need to put prepositions of place or direction such as above, below, etc.
