Decision: Major Revision

The study "**Cyber-Crime and Fraud Victimization of Online Halal Meat Shops: A Negative Image Propagation**" is per the journal's scope. However, I have some concerns that, if addressed by the authors, will make this study a valuable contribution to the body of literature.

- A. The introduction needs to justify and articulate the focus and questions of this study from the relevant scholarship, policy, and practice perspectives using relevant literature as support. Researchers should develop research objectives at the end of the introduction in alignment with the study focus. *Continuing with the notion of halal, which has the literary meaning of permissibility in Islam, it revolves around the food and beverage industries, whereas haram exists to indicate the ban of specific things following Islamic values and Shariah standards....* needs more clarity
- B. The authors should explain Halal Food and Cybercrime separately. *To mitigate the risk associated with halal meat supply chains, collaboration among many partners is held, resulting*

in the preservation of halal food integrity. Numerous additional parameters are included.....
Please state and explain which one.

- C. Methodologically it is a dual-perspective study report that discusses the motivations of both the online client and the internet marketer or the targeted businesses. The study focused on the primary concerns and identified the factors contributing to fraud victimization and halal meat shop regulation in online departments and organizations, thereby establishing the cyber aspects. The study evaluates the research objectives using a mixed-methods technique. This technique needs to be more detailed and clearer.
- D. The results section needs tables to present data in a consolidated form, i.e., Please add a table for the Financial Losses reported and Association among constructs
- E. The Discussion is much abbreviated. This section needs a description of your study aims and a brief summary of the findings as they relate to these aims, followed by a comprehensive summary of how your findings compare and contrast to those of previous researchers (including relevant citations) that I only see a few. This will give the paper greater consistency and structural coherence, leaving readers with a clear sense of the paper's aims and trajectory. Also, authors should present theoretical and practical implications with separate headings
- F. There is a need to add a separate section for the Limitations, suggestions, and implications.
- G. Authors should double-check their citations and match them with the end-text references. Moreover, there is a need to follow the APA 7th edition to record all the references in this study. Also, there is a need to add DOIs for reference.

Comments to authors

The detailed comments regarding each part of the manuscript are given as follows, which may be helpful to the authors in improving their paper.

- The start of the paper is good. However, too much detail in the introduction makes it boring and overworked. Rather than focusing on the gap and discussing the reason for proposing the model and justifying the proposed associations, the author/authors primarily did not focus on explaining Halal food. The detail of how this study can advance our knowledge in this area is missing. Moreover, the authors have not properly utilized to devise the research gap to make the manuscript more influential. The authors tried to present a gap, but the references are not updated.
- The literature review needs to be much more clearly written. The ideas are there, but they need to be explained further, and the ideas need to be more clearly linked together. An in-depth literature review is required to build a hypothesis and clearly understand the main concepts. There are many statements and claims, and paragraphs without references/citations. I must say there is a dire need to read the latest literature and support the arguments in hypothesis building.
- There is a need to explain the research methods with the help of tables.
- Results need to be more detailed, and authors should also report the descriptive statics in table and text form

- The discussion of the study requires a more explanation of the study findings and should present separate headings for findings, implications, and future research directions
- There is also a need to proof-edit the whole manuscript.

	I appreciate the authors for their good efforts in revising the manuscript. However, there are a few things that must be overcome before acceptance:	Once again, many thanks, dear reviewer, for allowing us to revise the manuscript. I have now revised the manuscript to meet your kind requirements.
1.	The abstract needs to be more refined in terms of purpose, methods, results, and implications	Dear reviewer, I have revised the abstract as per your kind suggestion Please see page 1
2	In the literature review, cybercrime and fraud maximization should be subsectioned independently of each other.	Dear reviewer, following your kind guidelines, I have revised the literature section. Please see pages 4-9
3	The authors should add a table for the Survey Methods and discussions.	Dear reviewer, Done as per your kind suggestion. Please see page 17
4	The article is very interesting, but it is a difficult read, given the issues of grammatical mistakes and language clarity. I suggest authors always have their work edited by an English professional editor before submissions.	Dear reviewer, following your kind guidelines, I have now proof-edited the paper with the help of professional native English speakers to enhance its quality and readability
