Dear author(s),

Congratulations!  
The 1st review for your paper was accepted.  
However, we are sorry to inform you that your paper cannot be recommended for publication in IJIES, in its current form.  
Please revise your paper according to the attached reviewers' comments.

Please note that if your paper is still not satisfactorily revised or cannot be returned to us within TWO months from the date of this letter, your paper will not be recommended to the journal above.

Thanks for your understanding and cooperation.

Kind Regards,  
IJIES Editors.

Dear Author(s),

Thank you for submitting your revised version.

However, the response letter is not attached to your e-mail.

To clarify the revised points, authors have a duty to submit the response letter.

Otherwise, the reviewers will be confused.

This is a general form of paper reviews in international journals.

There is no format for the response letter.

Best regards,

IJIES Editors.

Paper Title	Intelligent Control Of Power System Stabilizer Based On Archimedes Optimization Algorithm – Feed Forward Neural Network

Recommendation for Publication

<b>a) (Evaluation A) Accept</b> b) (Evaluation C) Accept after Major Revision	<b>a) (Evaluation B) Accept after 3-Ground Revision</b> b) (Evaluation D) Reject
--	---

Comments from reviewers 1 & 2:

1. "Many power companies is using" -> "Many power companies are using"
2. The quotation of previous articles, such as "Cuckoo search optimization [8-8], bat algorithm [9-12], whale optimization algorithm [13-15], salp swarm algorithm [16], bacterial foraging [17-20], firefly algorithm [21-23], fuzzy [24-26] and neural network [27-31]", is rough. These citations are meaningless. You must quote articles properly.
3. The problem definition of this work is not clear. In Sect.1, the drawbacks of above-mentioned conventional technique should be described clearly. The authors should emphasize the difference with other methods to clarify the position of this work further.
4. In the Introduction part, strong points of this proposed method should be further stated and organization of this whole paper is supposed to be provided in the end.
5. The explanation about the mathematical formulas is not enough. Furthermore, the meaning of variables is not clear. Readers will be confused. To help readers' understanding, the authors should add a notation list.
6. Please unify the font style. In sentences/equations, mathematical expressions must be italic font. (Some of them are italic font and others are Roman font) Otherwise, readers will be confused.
7. In figures, letters are too small. Unify the font size of letters (more than 10pt). Enlarge or Redraw figures. e.g. Fig. 4.
8. Which articles did you compare with the proposed technique? Indicate the reference number in sentences. Besides, the authors must cite the compared articles in References.
9. This paper lacks in-depth discussions in Sect.3. Readers will fail to understand the scientific contribution of this research. Show the theoretical reason why the proposed technique is better than existing techniques, because there is no theoretical explanation about compared existing techniques in previous sections. These existing techniques appeared suddenly in comparison. Explain the detail of the existing technique in previous sections.
10. In Sect. 3, compare the proposed method with other researchers' methods. In this paper, the comparison was performed between the proposed technique and FFNN only. There are many previous works. You can find it easily on the Internet. The authors should emphasize the difference with other researchers' methods. Add more comparison data.
11. FFNN has no relationship with the techniques discussed in the research survey of Sect. 1. What's the meaning of the research survey and references? Readers will not be able to understand it.
12. The results of this research are not clear in Conclusions. Furthermore, the benefits of the proposed method are not supported by theory. So, I fail to understand the scientific contribution of this research.
13. Future works as an integral part should be included in the Conclusions.
