

## **Referee's Report**

**Paper No.:** PPH-1612061-MS

**Title:** “Stability and simulation of measles transmission model with and without vaccination”.

**Author:** Budi Priyo Prawoto

**Recommendation:** Revision

I have gone through the paper and found it to deserve publication. However, before giving clear opinion, I shall like to see the paper revised so far as the presentation is concerned. There are several places where the paper can be condensed. Unnecessary mathematical details be avoided. English be cared and corrected. More recent and relevant references be added. Once the paper is revised in accordance to the suggestion, it can be considered for publication in the Far East Journal of Mathematical Sciences (FJMS).
